MEET TWINE

weekend
It's the weekend at DHSI and there are so many options available to

conference
The weekend conference is amazing, awesome stuff. Unfortunately, you're a bit

Mystic Vale
You head into the Mystic Vale via the Alumni Chip path. It's quiet and peaceful and

sleep
DHSI burnout is real! Take a great nap and wake up refreshed and ready to go

stick out the conference
You attempt to stick out the conference and fall asleep halfway

small path
You realize, halfway down a steep descent, that you are on a DHSI Deer trail. Luckily,

wide path
You continue walking until you see a branching of the trail. To your right is a

Monday morning.
It's DHSI time! Enjoy an awesome week with awesome people. And

vale
You're a bit turned around, this deep into the vale, but you follow the path until it

parking lot
Guilt at skipping the conference sends you out into the parking lot, and from

more wide path
You follow the wide path deeper in the vale but suddenly realize you've

narrower path
You find yourself on a staircase cut into the side of a steep hill. As you descend

INTERSTELLAR

Welcome to the INTERSTELLAR Text Adventure. Press any key to continue, and type *help* for information on how to play. You can also *ask PLEX about* things you encounter during the adventure. For additional information on text adventures, please reference the FAQ in the top navigation bar.

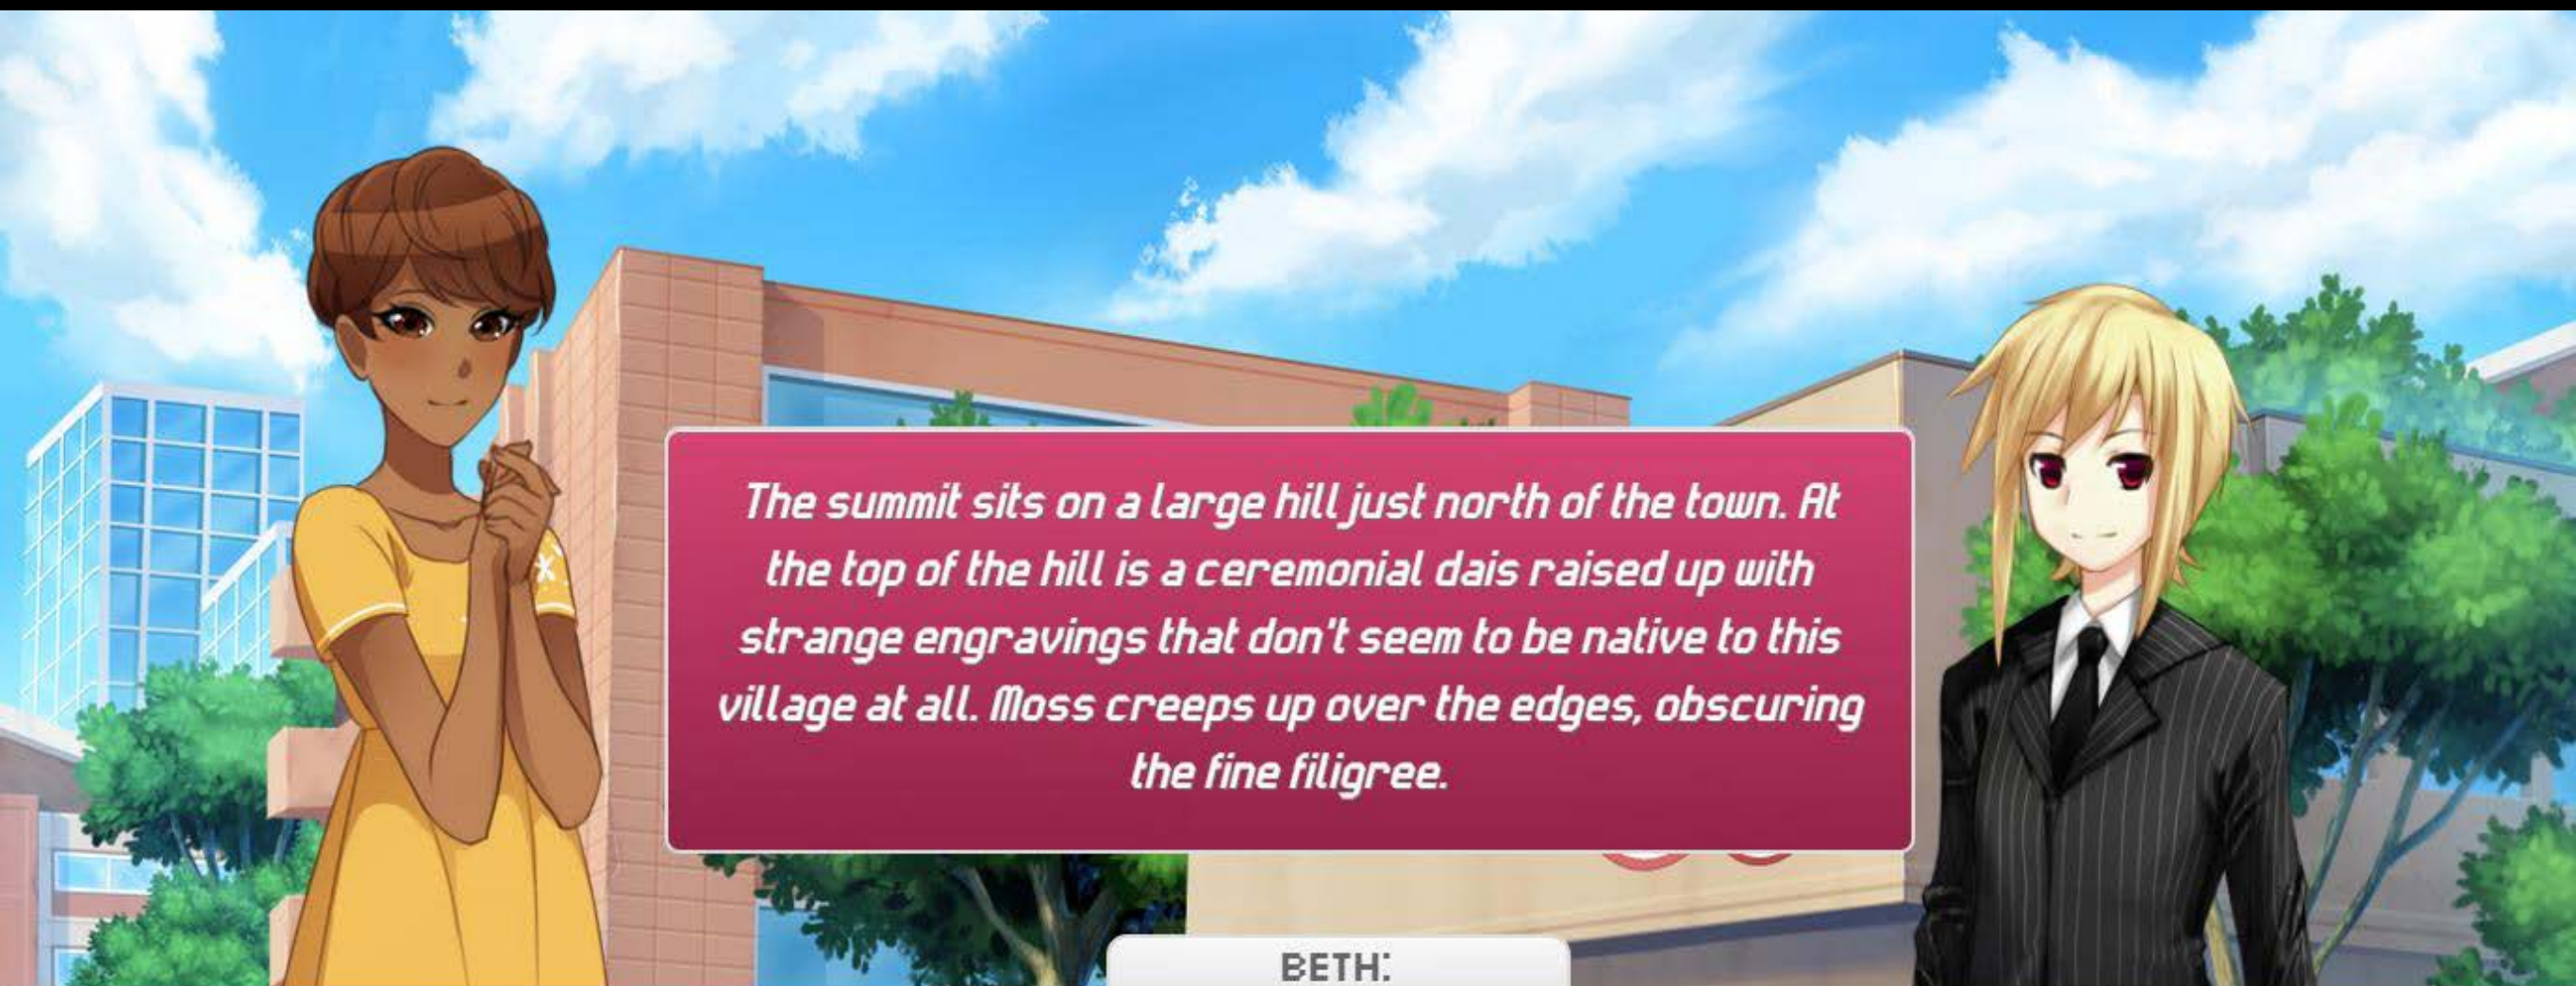

>

"I hope you're doing this for the right reasons. The best advice I can give is this: Pay close attention to what **NEEDS TO BE DONE**. It will be tempting to focus on what's going well, but you need to conquer **CHALLENGES** if you're going to make a good game."

"I recommend spending no more than 5 weeks on the game. It'll give you time do marketing."

BEGIN DEVELOPMENT

The summit sits on a large hill just north of the town. At the top of the hill is a ceremonial dais raised up with strange engravings that don't seem to be native to this village at all. Moss creeps up over the edges, obscuring the fine filigree.

BETH:

Welcome to Ironmoor! Our [quaint village](#) has so much to offer. We have... uh... stuff.

SEQUENCE

- A **Title Sequence** sequence is the method by which films, television (and increasingly games) present their title and credits, utilizing conceptual visuals and sound.
- Titles help establish the setting and tone of the game. They may consist of 3D or 2D animation, still images, and/or graphics design elements.

DONALD BARRETT

LEAD GAMEPLAY PROGRAMMER
JOEL BARTLEY

GAMEPLAY

“FEEL”

- Telling your story through “**feel**”,
a solid punch or a crisp jump.
- The abstract and often invisible
factors that make games surge
with life and energy.
- The combination of input, feedback,
writing, animation, and sound design.
- It is the **umami** of game design.
