

Grading Introduction

Grading Introduction

We will start off with a more guided approach, but as we get further into the project you will be increasingly proposing tasks yourself.

For the first Module, I've broken out specific tasks you should complete. You will need to do all of the tasks to get the full mark.

Expect the number of points you need for each grade to increase as we progress through the course.

Marking Introduction:

We will be using a point based system to simplify deliverables and ensure students have an ability to work on the specific tasks they are best suited for and interested in doing.

In Class Grading

During class, time will be provided for In-Person grading, where you can demonstrate to the instructor that the work is complete. This allows students to avoid grading surprises, and for the instructor to give immediate, on the spot feedback.

This has been successfully used in other courses and was found to greatly simplify the marking process and take pressure off of students trying to hit complicated rubric goals.

We'll be using this system in both Game Development 2 and Modern Tech, starting with a more guided approach, and eventually moving towards a self directed one.

Points & Grades Introduction:

Each deliverable will be worth 1 point. The deliverable is either considered Completed, Somewhat Completed, or Not Completed. There are no part marks outside of this.

Completed = 1/1 Point
Somewhat Completed = 0.5/1 Point
Not Completed = 0 Points

Assignments that are Somewhat Completed will be returned to students with specific feedback identifying what needs to be done to bring it to a Completed state.

At the end of a module, the points will be converted to a mark.
See **GD2- Assignment 1 - Final Grading Summary** for full details.

In Class Grading Introduction:

Grading can be done in 2 ways:

1. In Class - In Person - During class, time will be provided for In-Person grading/ You can demonstrate to the instructor the work is complete. (You should still submit the assets to the drop box for reference)
2. Place it in the Dropbox before the Hard Deadline and let the instructor grade it.

GD2- Assignment 1 - Part A (of 2) - Week 1 & 2 - Character Development 1

Introduction

Project Setup

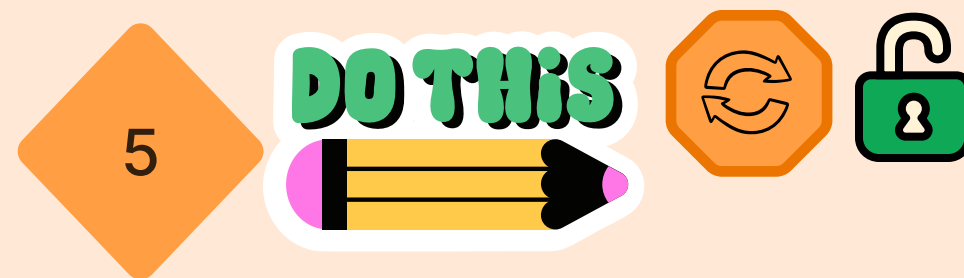

Introduction: Week 1

To get you used to the modular assignment format, the first few weeks will contain specific tasks you need to complete.

Each task you complete gets you one point, then the points translate into the final grade at the end of the module. See **Grading Details** section for more on how marks are calculated.

This is the first part of a two part submission for Assignment 1. Each

Tasks

Each Student should modify the settings of the base Platformer Character to find something we are happy with.

Change at least 3-5 of the settings and include a short paragraph answering each of the reflection questions outlining your process:

Deliverables:

☐ Successfully in a project and tested in class as a **build**. (In Class) Doesn't have to be the shared project (but it could be).

☐ Detailed Play test notes from the in class play test, with a plan on how you will address the feedback. You should have at least 3 people play test your character.

☐ Reflection Questions answered with appropriate thought and care. Meaningful answers given that show consideration and detailed understanding of the movement in UE. (Hand-In)

☐ A video clearly demonstrating your movement.

☐ Completion Bonus: Complete the previous 4 tasks to receive an extra bonus point.

GD2-A1_CD1- Reflection Questions

Reflection Questions

1. What is the movement concept? How should it feel to be the character? How would you describe their movement?
2. What are some games that you can reference that give you a good sense of this?
3. What do those games do to address Q1? What do they not do well?
4. How do your settings achieve this goal.
5. Create one additional question and answer it.

Grading

Grading Overview

Week 1 - Grading Overview

See **A1 - Grading Detail** for more information

For this week, we will have a Soft Deadline, meaning the tasks here **should** be done to be reviewed and discussed next week, but you'll have time to adjust and resubmit before the Hard Deadline.

You should be aiming for at least 2 points a week to pass, and at least 5 points per week for an A for this assignment.

The first assignment will include an extra week for testing and review to help you get used to the new format.

Soft Deadlines:

Assignment A1-A (Character Design 1)
Soft Deadline: Tuesday, Jan 13th

Assignment A1-B (Level Design 1)
Soft Deadline: Tuesday, Jan 20th

Final Submission Date:

Hard Deadline: Jan 24th

BOTH A1-A and A1-B documents:
Assignment A1-A (Character Design 1)
Assignment A1-B (Level Design 1)

Summary/Self Assessment Guide: Week 1 - A1-A

4 + 1 - Mandatory Grades - You must get at least 2 of these complete the assignment.

Update the Player Character:

Deliverables:

- ☐ Tested as a build
- ☐ Detailed Play test notes for 3-5 people.
- ☐ Reflection Questions answered.
- ☐ A Video (3-5 minutes)
- ☐ Completion Bonus: All 4 Previous Tasks.

FAQ

A1 - Grading Detail

This assignment has two parts. We will tackle A1-B in week 2. I'll give you an extra week (week 3) to get used to the format and get feedback before final submission.

Tasks will be assigned each week, at the end of the sprint, you'll submit all documentation for all 3 weeks of the sprint at once.

Assignment 1-A: 5 Points Available
Assignment 1-B: 5 Points Available

Each of the Deliverables are worth 1 Point.

GD2 - A1: Rubric

Points are converted to grades in the following way:

(Sprint 1: Jan 7th - Jan 24th)

4 Points ⇒ 50% or D
5 Points = 60% or C
6 Points = 70% or B
8 Points = 80% or A
9 Points ⇒90% A+
10 Points ⇒ 100% A++*

*(just kidding, there is no A++ but you get the satisfaction of a job well done.)

FAQ:

Late Assignments:

It's important tasks on done on time as other classes and tasks are depending on them.

See the course outline for full details on late assignment submission.

Soft Deadlines vs Hard Deadlines

Soft Deadline:

You **SHOULD** have the task completed by this time to keep up with class. If you don't you'll still have some extra time (but not in class) to update or refine the deliverables.

Hard Deadline:

Everything must be delivered by this date into the dropbox.
