PROJECT 03: Game Feel + Accessibility

INTRODUCTION

This one is simple (and hopefully fun)!

Choose a game, any game. Play it for 3-4 hours.

While playing, pay close attention to:

GAME FEEL (NARRATIVE DESIGN 3)

- 1) Identify elements within the game that provide "The Juice".
 - Input (responsiveness, haptics, etc.)
 - Animation (shake, pauses, exaggeration)
 - Sound design (music, foley, sound effects)
- 2) Identify missed opportunities for adding snappy game feel.
(Things you would add if you were designing the game.)

ACCESSIBILITY (GAME BIZ 3)

- 1) Identify accessibility options within the game.
(You'll want to explore the game's settings)
 - Vision
 - Sound
 - Mobility
- 2) Identify missing accessibility options within the game.
(Things you would add if you were designing the game.)

PROCEDURE

- Research the design of your chosen game.
- Take notes during your play through.
- Provide examples from other games as reference for your desired game feel and accessibility additions.

DUE DATE

Sunday, November 9h, 2025 (before midnight)

(You'll be emailing a Notion link)
