Instructor:

Chris Pointon

PROJECT 01: A Better Studio

INTRODUCTION

For this project we are going to focus on ways to build an equitable, safe, and, stable studio for yourself, your collaborators, and employees.

QUESTIONS

EQUITY:

- How will you encourage diversity and representation?
- How will employees benefit from the success of your studio? (Think - salaries, studio ownership, profit sharing)

SAFETY:

- What would you do if an employee/co-worker communicated that they were being harassed?
- Are there policies you could put in place to protect your employees/co-workers?

STABILITY:

- How will communicate with your employees/co-workers? (Think - meetings, employee reviews, etc.)
- How would you deal with financial setbacks?

PROCEDURE

Use the questions above as a starting point for participating in an in-class discussion on **September 9th**. As opposed to structured, written answers, you may capture your thoughts in loose notes, bullet points, and bookmarks of relevant online content (articles/videos). **There will not be anything that you will need to submit.**

In addition to talking about your answers, you are also encouraged to have questions prepared for the instructor (moi) and your classmates. **In advance of the discussion, I will be presenting a lecture on "equity, safety, and stability".**

DUE DATE

Tuesday, September 9th, 2025

Group discussion on the above date.
